I pay for and listen to XM Radio every day of the week. I also use the local broadcast for traffic and weather for St. Louis, MO or anywhere else that I may travel. I don't know why anyone would want to discontinue this service. I enjoy the selections of all kinds of music, news, comedy, etc. without having to try to tune in to unknown stations when traveling. There is no interruption of service from one location to another.

I think that if satellite TV is allowed (which I also subscribe to) or cable tv is allowed, then XM radio should also be allowed.

Thank you for the consideration of rejecting the National Association of Broadcaster's petition 04-160. PLEASE SUPPORT XM RADIO. THERE IS NOTHING BETTER FOR TRAVELERS OR EVEN FOR PEOPLE SUCH AS ME WHO ENJOYS IT DAILY!!!
